

STATE OF TEXAS  
OFFICE OF THE GOVERNOR

In Texas, we place immense value on our children because we understand they are the leaders of tomorrow. An important part of ensuring young Texans stay on the road to success is making sure they have a rigorous and well-rounded education. For some children, learning new things and succeeding in their classes is a smooth process. For others, additional or specialized instruction is necessary to maximize their success. When young Texas need a helping hand, educational diagnosticians play a vital role in improving their education.

Educational diagnosticians undergo specialized training and use academic and psychological tests to recognize factors that could enhance students' performance in the classroom. These professionals help provide our next generation of leaders with the foundational skills on which they can build a lifetime of success, both inside and outside the classroom, by developing and recommending teaching strategies and material research. As Texas' schools and educators continue to adapt to the ever-evolving needs of our students, the contributions of educational diagnosticians in improving our children's education will remain crucial to their success.

As part of an ongoing effort to highlight their contributions and to demonstrate gratitude for their service, every year a week in March is dedicated as Educational Diagnosticians Week.

At this time, I encourage all Texans to recognize the invaluable contributions of educational diagnosticians in our education system. Their hard work helps ensure a better future for young Texans and therefore the Lone Star State.

Therefore, I, Greg Abbott, Governor of Texas, do hereby proclaim March 7-11, 2022, to be

## Educational Diagnosticians Week

in Texas and urge the appropriate recognition whereof.

In official recognition whereof, I hereby affix my signature this the 7<sup>th</sup> day of February, 2022.

A handwritten signature in black ink, reading "Greg Abbott".  
Governor of Texas
